

19BSM406- Programming with Python										
Teaching Scheme					Examination Scheme					
L	T	P	C	Hrs/Week	Theory			Practical		Total Marks
					MS	ES	IA	LW	LE/Viva	
3	--	2	-	5	25	50	25	--	--	100
<b>OBJECTIVES</b>										
<p>1. To develop applications using the Python Programming language by understanding various data structures available in Python programming language and apply them in solving computational problems</p> <p>2. Able to test and debug codes written in Python and would be able to draw different kinds of plots using PyLab for scientific research</p>										
<b>SYLLABUS</b>										
<b>Unit-I</b>									<b>10</b>	
<p><b>Introduction to Python:</b> The basic elements of Python, Branching programs, Strings and Input, Iteration <b>Functions, Scoping and Abstraction:</b> Functions and Scoping, Specifications, Recursion, Global variables, Modules, Files <b>Testing and Debugging:</b> Testing, Debugging</p>										
<b>UNIT II</b>									<b>10</b>	
<p><b>Structured Types, Mutability and Higher-order Functions:</b> Tuples, Lists and Mutability, Functions as Objects, Strings, Tuples and Lists, Dictionaries  <b>Exceptions and assertions:</b> Handling exceptions, Exceptions as a control flow mechanism, Assertions</p>										
<b>UNIT III</b>									<b>10</b>	
<p><b>Classes and Object-oriented Programming:</b> Abstract Data Types and Classes, Inheritance, Encapsulation and information hiding  <b>Some Simple Algorithms and Data Structures:</b> Search Algorithms, Sorting Algorithms, Hashtables</p>										
<b>UNIT IV</b>									<b>9</b>	
<p><b>Plotting and more about Classes:</b> Plotting using PyLab, Plotting mortgages and extended examples  <b>Dynamic Programming:</b> Fibonacci sequence revisited, Dynamic programming and the 0/1 Knapsack algorithm, Dynamic programming and divide and conquer</p>										
<b>APPROXIMATE TOTAL</b>									<b>39 Hours</b>	
<b>OUTCOMES</b>										
<p>1. Understand the basic concept of programming with python.</p> <p>2. To develop know-how in creating applications using the Python Programming language</p> <p>3. To be able to understand the various data structures available in Python programming language and apply them in solving computational problems.</p> <p>4. Ability to create robust applications for solving computational problems using the Python</p>										

programming language

5. Ability to test and debug applications written using the Python programming language.
6. To be able to draw different kinds of plots using PyLab and generating series
